Art Unit: 2111

1. Claims 1-36 are presented for examination.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claim 1, "marking the instruction as a slowable instruction" is an abstract description that does not involve any physical element.

(b) Claim 1, it is not clear what is the use of "marking the instruction as a slowable instruction."

(c) Claims 9, 19, and 27, the same as (a) and (b).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Toda et al taught a method of delaying the provision to a register of a value delivered until the register is actually used.

Sawamua taught a method of marking an instruction whose operands are used by subsequent instructions.

Holmann et al taught a method of delaying execution of an instruction.

Art Unit: 2111

5. Claims 4-8, 13-16, 22-26, and 31-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The references of record do not teach the delaying of the processing of an instruction the second time around when the result of the instruction stored in a register is not immediately used by subsequent instructions and so marked.
